RECEIVED PHO

DEPARTMENT OF ENVIRONMENTAL QUALITY WATER QUALITY DIVISION PERMIT APPLICATION FEE FORM REVISED EFFECTIVE JANUARY 1, 2008

INSTRUCTIONS

Applicants for individual Virginia Pollutant Discharge Elimination System (VPDES), Virginia Pollution Abatement (VPA), Virginia Water Protection (VWP), Surface Water Withdrawal (SWW), and Ground Water Withdrawal (GWW) Permits are required to pay permit application fees, except farming operations engaged in production for market. Fees are also required for registration for coverage under General Permits except for the general permits for sewage treatment systems with discharges of 1,000 gallons per day (GPD) or less and for Corrective Action Plans for leaking underground storage tanks: Except for VWP permits, feesmust be paid when applications for permit issuance, reissuance* or modification are submitted. Applicants for VWP permits will be notified by the DEQ of the fee due. Applications will be considered incomplete if the proper fee is not paid and will not be processed until the fee is received. (* - the reissuance fee does not apply to VPDES and VPA permits - see the fee schedule included with this form for details.)

The permit fee schedule is included with this form. Fees for permit issuance or reissuance and for permit modification are included. Once you have determined the fee for the type of application you are submitting, complete this form. The original copy of the form and your check or money order payable to "Treasurer of Virginia" should be mailed to:

Department of Environmental Quality Receipts Control P.O. Box 1104 Richmond, VA 23218

A copy of the form and a copy of your check or money order should accompany the permit application. You should retain a copy for your records. Please direct any questions regarding this form or fee payment to the DEQ Office to which you are submitting your application.

| Wastewater Treatment Works | Location | Treatment Process | Annual Production |
|----------------------------------|----------------------|---------------------|---------------------|
| County of Henrico | Henrico Co., VA | Anaerobic Digestion | 29,000 wet tons/yr |
| Falling Creek | Chesterfield Co., VA | Anaerobic Digestion | 8250 wet tons/yr |
| Powhatan Dept of Corrections/ESV | Powhatan Co., VA | Aerobic Digestion | 1200 wet tons/yr |
| Proctors Creek | Chesterfield Co., VA | Anaerobic Digestion | 18762 wet tons/yr |
| WASA - Blue Plains | Washington, D.C. | Lime Stabilized | 200,000 wet tons/yr |
| Farmville | Farmville Co., VA | Aerobic Digestion | 2000 wet tons/yr |
| Chatham | Chatham Co., VA | Aerobic Digestion | 500 wet tons/yr |
| Piscataway | Accokeek, MD | Lime Stabilized | |

FIELD OPERATIONS AND TRANSPORT

Following loading at the WWTW, the biosolids will be transported to the application sites using the most direct primary and secondary state highways. The drivers will be instructed to avoid residential areas where possible.

Prior to initiating field operations, the farm operator will be contacted relative to available fields, specific field conditions, and anticipated cropping schedule. Field conditions will be deemed acceptable only when both the farm operator and the field superintendent concur. Daily field records will be kept by the field superintendent utilizing a voucher ticket system to keep track of biosolids delivered and applied at the application site.

Trucks will be unloaded in the field at designated staging areas. To minimize field compaction by applicator and truck traffic, the staging areas will be selected in regard to buffer restrictions, topography, access, farm management concerns, and soil conditions. Although several staging areas will be required for the typical field, all efforts will be made to minimize the number of staging areas.

Cake biosolids will be removed from the staging area with the use of a John Deere 544H rubber-tired front end loader equipped with a 4 cu yd bucket or similar front end loader. Next, the biosolids will be loaded into a Knight Proslinger spreader box with a side discharge applicator, or onto a similar applicator. The spreader box will be pulled by a John Deere 9400 farm tractor or similar farm tractor which will provide the power take off for the spreader box ram and beaters.

Following biosolids application the biosolids will be incorporated into the soil if the cropping system allows. On hay and pasture fields, biosolids will be surface applied.

Prior to leaving the application site, the transportation trucks will be scraped along wheels, mud flaps, tailgate, etc., to minimize tracking mud onto state highways. The drivers will be instructed on the importance of preventing mud from being tracked onto state roads relative to public perception of site activities and safety considerations.

Once an area of the farm has received the design application rate, the sludge application operation will relocate and phase out the staging area. Each staging area will be inspected by the field superintendent who will direct the phase out. Biosolids, including some small amounts of soil, in the staging areas will be collected with the front end loader and then land applied in the normal manner.
